

The background of the top half of the page is a dark, high-angle photograph of a group of people sitting around a table in a meeting. The AQ Production logo is centered over this image. The logo consists of a large 'AQ' in white and orange, with 'PRODUCTION' in white below it, and 'YOUR DIGITAL PARTNER' in orange below that. At the bottom of the top half, the words 'COMPANY PROFILE' are written in large white letters.

Motion Graphic Video

A motion graphic video is a dynamic and visually engaging medium that combines text, graphics, and animation to deliver a message or tell a story. Through careful scripting, storyboarding, and design, motion graphics professionals bring static assets to life, adding movement, transitions, and effects that captivate viewers. These videos are widely used in advertising, marketing, entertainment, and education industries to convey information effectively and creatively. With the help of animation software like Adobe After Effects, motion graphic artists can create visually stunning and immersive experiences that leave a lasting impact on audiences.

- Concept development
- Storyboarding
- Animation
- Visual effects
- Sound design
- Voiceover narration
- Video editing
- Motion graphics integration
- Color grading
- Final rendering and delivery

02

Graphic Designing

Graphic design is a dynamic field that combines visual elements, typography, and images to communicate messages effectively. It involves the use of design principles, tools, and techniques to create visually appealing designs for various mediums such as print and digital platforms. Graphic designers work with clients to understand their needs and translate them into visually compelling designs. With a focus on layout, color, typography, imagery, and composition, they create balanced and harmonious designs that convey the intended message. Whether it's branding, web design, . ,or illustration

- Logo design
- Web design
- Illustration
- Packaging design
- Infographic design
- Poster design
- Brochure design
- Social media graphics
- Motion graphics
- Typography design

03

Video Editing

Video editing is a crucial process in video production that involves manipulating and rearranging video footage, audio, and visual elements to create a compelling and cohesive final product. Skilled editors utilize specialized software to assemble and refine the footage, selecting the best shots and arranging them in a logical sequence to convey a story or message effectively. They trim and cut unnecessary parts, merge different shots, and adjust timing to create a smooth flow. Additionally, editors enhance the visual quality through color correction, incorporate visual effects and animations, adjust audio levels, and add text and graphics to provide context or information.

- Format conversions
- Color grading
- Transitions
- Motion graphics
- Sound editing
- Titles and captions
- Visual effects
- Audio mixing
- Storytelling enhancements

04

3D Modelling

3D modeling is the art of creating digital representations of objects or scenes with depth and dimension. It involves using specialized software to build virtual models by defining their shape, texture, and appearance. These models find applications in industries like animation, gaming, architecture, and product design, where they help visualize concepts, create lifelike characters, and simulate environments. With a combination of technical skills and artistic creativity, 3D modeling offers a powerful tool for bringing imagination to life and crafting visually captivating experiences

- Texturing
- Rendering
- Animation
- Rigging
- Sculpting
- Lighting
- Visualization
- Virtual Reality (VR)
- Augmented Reality (AR)

05

PR Management

Public rotation management involves strategically planning and coordinating the movement of employees within a public organization. It aims to enhance employee skills, broaden their experiences, and optimize organizational effectiveness. By rotating employees through different positions, departments, or locations, organizations can develop talent, foster collaboration, and address succession planning. Effective implementation requires clear objectives, policies, and technology tools to track skills and preferences. Through transparent communication and evaluation, public rotation management programs can cultivate a versatile workforce

- Press releases
- Media relations
- Crisis management
- Reputation management
- Brand messaging
- Event coordination
- Stakeholder communications
- Thought leadership positioning

06

Website Development

Website development is the process of creating and building websites by combining technical skills and creative design. It involves front-end development to create the visual and interactive elements of a website, back-end development to handle server-side functionality, and may include the use of a content management system for easy content management. It requires a combination of coding languages, such as HTML, CSS, JavaScript, and programming languages like Python or PHP. The goal of website development is to create engaging, functional, and user-friendly websites that meet the specific needs of businesses

- Custom website design
- Responsive web development
- E-commerce integration
- Content management system (CMS)
- SEO optimization
- Mobile app development
- User experience (UX) design
- Website maintenance and support

07

Google & Social Media Ads

Google and social media ads provide businesses with a powerful way to boost their online visibility and reach their target audience. With Google Ads, advertisers can display their ads to users searching for specific keywords or browsing relevant websites, while social media platforms offer targeted advertising options based on user demographics and interests. By utilizing these advertising platforms, businesses can increase their brand exposure, drive traffic to their websites, and effectively engage with potential customers to achieve their marketing objectives.

- Google Ads
- Social Media Ads
- Targeted campaigns
- Ad creation
- Ad optimization
- Keyword research
- Ad targeting
- Budget management
- Performance tracking

08

Wedding & Event Photography Videography

Wedding and event photography and videography are the art of capturing unforgettable moments and emotions during special occasions. These skilled professionals use their creative vision and technical expertise to document every detail, from the smallest decor elements to the heartfelt interactions between people. With their keen eye for composition, lighting, and timing, photographers and videographers preserve precious memories that will be cherished for a lifetime. They work closely with clients to understand their unique vision, ensuring that every significant moment is beautifully captured and transformed into a lasting visual narra

- Candid shots
- Professional portraits
- Creative compositions
- Photojournalistic style
- High-resolution images
- Videography coverage
- Cinematic highlights
- Drone footage

The background of the slide features a blurred image of two hands shaking, symbolizing a partnership or agreement. Overlaid on this image are several white icons: a person icon, a cube, a trash can, and a hand holding a document. The number '09' is prominently displayed in the top left corner, underlined with an orange bar.

09

Customize Services

Customized services are personalized solutions that cater to the specific needs and preferences of individual clients. By going beyond standard offerings, businesses can provide unique and tailored experiences that enhance customer satisfaction. Whether it's through product customization, personalized experiences, or tailored professional services, customization allows businesses to address the unique requirements of each customer, fostering stronger relationships and delivering exceptional value.

- Strategy Development
- Content Creation
- Advertising Campaigns
- Community Engagement
- Influencer Outreach
- Monitoring & Analysis

10

Event Management

Event management involves the intricate coordination of all aspects of an event, from initial concept development to flawless execution. Event managers work closely with clients to understand their objectives, budget, and vision, and then bring that vision to life through meticulous planning and organization. They handle tasks such as venue selection, vendor management, budgeting, marketing and promotion, logistics, and on-site coordination to ensure that every detail is taken care of. With their expertise

11 SEO

SEO, or Search Engine Optimization, is the practice of improving a website's visibility and ranking in search engine results. By optimizing various aspects of a website, such as its content, structure, and keywords, SEO helps drive organic traffic and attract users who are actively searching for relevant information. It involves on-page optimization, technical optimization, and off-page factors such as backlink building. The goal of SEO is to enhance a website's online presence, increase its visibility, and improve its chances of being found by potential visitors.

- Keyword research
- On-page optimization
- Off-page optimization
- Link building
- SEO auditing
- Content optimization
- Technical SEO
- Local SEO
- SEO analytics
